

On September 3 and between September 8-10, 2026, the Center for Strategic Politics conducted an English-language survey of 683 Democratic voters across the United States using SMS-to-web and online panel sources. Where applicable, answers were randomized when presented to respondents. Respondents outside the sampled population were screened by self-identification and voter file match. The sample was weighted to be representative of Democratic voters by age, ethnicity, and gender. The margin of error is  $\pm 3.75\%$ . This survey was commissioned for Liberal Currents.

The **High/Low Trust** crosstabs consist of respondents who scored above/below the median on the social trust battery (**Questions 11.1-11.8**).

The **High/Low Knowledge** crosstabs consist of respondents who scored above/below the median on the political knowledge battery (**Questions 10.1-10.8**).

The **Yes/No Woke** crosstabs consist of respondents who self-identified as woke or unwoke.

Crosstabs for demographic sub-groups with insufficiently high sample sizes have been omitted.
