

Between October 8th and October 12th, 2026, the Center for Strategic Politics conducted an English and Spanish language survey of 416 likely voters in California's 34th Congressional District using SMS to collect web responses. Where applicable, answer orders were shuffled when presented to respondents. Respondents outside the sampled population were screened by voter file match and self-identification. The sample was weighted to be representative of likely voters by age, race, gender, education, and primary vote recall. The margin of error is $\pm 4.80\%$. This survey was commissioned by Angela for CA-34.

Crosstabs for demographic sub-groups with insufficiently high sample sizes have been omitted.
