Between October 28th and October 30th, 2026, the Center for Strategic Politics conducted an English-language survey of 310 likely voters in Michigan's 13th Congressional District using SMS to collect web responses. Where applicable, answer orders were shuffled when presented to respondents. Respondents outside the sampled population were screened by self-identification and voter file match. The sample was weighted to be representative of likely voters in MI-13 by age, race, gender, education, and primary turnout. The margin of error is ±5.57%. This survey was commissioned for the Democratic Socialists of America's National Electoral Commission.

Crosstabs for demographic sub-groups with insufficiently high sample sizes have been omitted.
